The library includes four sub libraries: • SlibEx – Controls the scanner activity and contains the last scanned image in an internal memory.. The Symbol DS6708-DL Handheld Imager Scanner includes 1D/2D barcode scanning and is designed to read the PDF417 barcode on U.. Each sub library can function as an individual library regardless of the other libraries.. This library controls the scanning settings such as scan size, color scheme and resolution.. Using the Driver Licenses & Passports SDK, you can control the ScanShell/SnapShell scanner, detect card insertion into the scanner, acquire card images, process them one at a time or in batches, and retrieve the results sorted into fields such as name, ID number, social security number, address, DOB, issue date, city, state and zip code.
